# MEDICAL CERTIFICATE OF DIAGNOSIS

Issued in support of a Recovery (Trauma) / Specified Injury insurance claim.

### Patient

| | |
|---|---|
| **Full name** | Daniel James Mercer |
| **Date of birth** | 14 March 1986 (age 40) |
| **Address** | 27 Kingfisher Crescent, Penrith NSW 2750 |
| **Medicare no.** | 2954 81632 1 (IRN 1) |
| **Policy / Claim** | AP-4471823 / CLM-2026-0048817 |

### Diagnosis

I certify that I have personally examined and treated the above patient and confirm the following diagnoses, sustained in a single traumatic event (a fall from approximately four metres) on **18 March 2026**:

| # | Diagnosis | ICD-10-AM | Date diagnosed | Method of confirmation |
|---|---|---|---|---|
| 1 | Comminuted fracture, shaft of right femur | S72.30 | 18/03/2026 | Plain radiograph (2 views) |
| 2 | Compression (wedge) fracture of L1 vertebra, ~30% height loss, stable | S22.06 | 18/03/2026 | CT lumbar spine |
| 3 | Closed fracture, distal right radius | S52.50 | 18/03/2026 | Plain radiograph |

**Primary diagnosis for this claim:** Comminuted fracture of the right femur (a major long-bone fracture) sustained in an accident.

### Certification against policy definition

In my opinion the above fractures resulted from a single accidental traumatic event, were not the consequence of any pre-existing condition, and the fracture of the femur is a complete fracture of a major long bone requiring surgical fixation. On this basis I consider the diagnosis to satisfy the definition of a **Fracture / Specified Injury** event as commonly defined under Recovery (Trauma) cover. Final eligibility remains a matter for the insurer's assessment against the specific policy terms.

| | |
|---|---|
| **Date of accident / onset** | 18 March 2026 |
| **Date of diagnosis** | 18 March 2026 (Nepean Hospital Emergency Department) |
| **Definitive surgical treatment** | ORIF right femur with intramedullary nail, 19/03/2026 |
| **Current status** | Stable, healing; mobilising with crutches; under ongoing review |
| **Pre-existing conditions** | Nil relevant |
